We are delighted to announce that colleagues from the Japan Society for the Promotion of Science (JSPS) will visit Newcastle University on 28 June 2017. JSPS is the leading research funding agency in Japan, established by the Japanese Government for the purpose of contributing to the advancement of science. JSPS funds a number of fellowship programmes for researchers at all stages of their career and in all fields of science, including the humanities and social sciences. These programmes provide opportunities for excellent UK researchers to go to Japan to conduct academic collaboration with Japanese researchers and can be used to build wider institutional relationships.
